Comments on the 2 Underground Injection Control (UIC) Draft Area Permits to Powertech (USA) Inc. & the associated aquifer exemption & Cumulative Effects Analysis, -- One Permit is a potential UIC Class III Area Permit for injection wells for the ISR of uranium; the second is a potential UIC Class V Area Permit for deep injection wells that will be used to dispose of ISR process waste fluids into the Minnelusa Formation

From page xxx of the Executive Summary of SEIS on Dewey Burdock:

*"The purpose and need for the proposed federal action is to either grant or deny the applicant a license to use ISR technology to recover uranium and produce yellowcake at the proposed project site."
From page xxx of Executive Summary "Environmental Impact Statement for the Dewey-Burdock Project in Custer and Fall River Counties, South Dakota Supplement to the Generic Environmental Impact Statement"*

How is any intention to deposit ISR wastes from other facilities part of the SEIS's "Purpose and Need"?

If actions allowed under license are additional to and not included in the SEIS's - Purpose & Need, how is that justified? How can NRC have created a sufficient "range of alternatives"?

Thanks,
